Which best describes your position regarding the buck deer permit recommendations?

Somewhat agree

Do you have any additional comments about the buck deer permit recommendations?

Start General Rifle hunt on Wednesday close Sunday. 5 day hunt only. Change Dedicated hunter program bag limit to 1 buck deer in the 3 year program. Raise Dedicated Hunter tag fee to, \$300. Thank you for your work.

Which best describes your position regarding the buck deer permit recommendations? Strongly agree

Do you have any additional comments about the buck deer permit recommendations? I have submitted for buck deer draw, and hope I am successful, but agree the animals are facing adverse drought and should be given consideration. I'm glad to see this recommendation and am surprised the decrease isn't more.

Which best describes your position regarding the bull elk and pronghorn permit recommendations? Somewhat disagree

Do you have any additional comments about the bull elk and pronghorn permit recommendations? I'm not seeing the bull elk population you're claiming. Saw an uncomfortably high amount of hunters in general season last year. Wondered if I was going to be shot in crossfire. I'd rather the number of elk tags go down to really build up bigger herds and help them through this drought, even though I've submitted for draw and hope to be successful.

Which best describes your position regarding the buck deer permit recommendations? Strongly agree

Do you have any additional comments about the buck deer permit recommendations? The great state of Utah should up the price on deer permits and make them 3 or 4 point or better on bucks the deer hunting has gone to [REDACTED] in utah

Which best describes your position regarding the bull elk and pronghorn permit recommendations? Strongly disagree

Do you have any additional comments about the bull elk and pronghorn permit recommendations? Up the price on tags and make it 6 point or better there won't be any elk left in the next 10 years in utah and completely shut down the spike only hunts down the elk hunting has gone to [REDACTED] in utah

Which best describes your position regarding the buck deer permit recommendations?

Somewhat agree

Do you have any additional comments about the buck deer permit recommendations?

I think that a decrease in the number of permits is absolutely necessary; however, I do not feel that you have sufficiently cut the number. For instance, on the Cache Unit, you have recommended that the number of permits stay at 5,000; however, if you speak with the serious hunters who hunt that unit, I believe that most would concur that there are not 5,000 bucks across the whole unit. Deer numbers in that area have decreased dramatically over the last few years and everyone has noticed. Please reconsider decrease the number of permits on the cache unit and decreasing across the state by more that is currently recommended.

Which best describes your position regarding the buck deer permit recommendations?

Strongly agree

Do you have any additional comments about the buck deer permit recommendations?

I'm am so glad that the state is recognizing this as a problem. All I've heard for the past couple years is that "There have never been more deer." And we are far from it. I remember (I'm 24) when there were a lot of deer and you could look at a little two point and want to let it go because you knew you would see something bigger. Now, if it has antlers, it's gone. I would rather see a healthy deer population than get a little two point every year.

Which best describes your position regarding the buck deer permit recommendations? Strongly agree

Do you have any additional comments about the buck deer permit recommendations? I think it's great. I would even recommend we take it down another 5%. Our deer populations have really been hit hard the last couple years they could use a couple years of lessened pressure.

Which best describes your position regarding the bull elk and pronghorn permit recommendations? Somewhat disagree

Do you have any additional comments about the bull elk and pronghorn permit recommendations? I think the any bull elk hunt is over crowded and does not allow for a great hunt. The herds are incredibly pushed. I think the 17.5k tags is much too high. I'm in favor for 12.5k tags

Which best describes your position regarding the buck deer permit recommendations? Strongly agree

Do you have any additional comments about the buck deer permit recommendations?

Thank you for continuing to help deer herds in Utah. I haven't been in the state for too long, but I've done quite a bit of hiking, hunting, and wildlife viewing, and have yet to see a mature buck. Of course, that's just me talking, but it sounds like I'm not the only one. I think either specifically cutting back rifle permits for general season or setting an antler point minimum in popular units may help with buck recruitment, but that's just my opinion. Overall, I think Utah DWR has the right idea and the right ethos in approaching this problem. I for one will gladly take fewer hunting chances for a few years if it means a future with higher quality and quantity bucks.

Which best describes your position regarding the bull elk and pronghorn permit recommendations? Somewhat agree

Do you have any additional comments about the bull elk and pronghorn permit recommendations?

I like Utah's approach with balancing quality and opportunity in the state. I would request that archery get more of a priority in limited entry hunts during the rut and maybe overlap that or follow it with a muzzleloader hunt. Bowhunting is growing rapidly, and this would make Utah an excellent destination for bow hunters.

Which best describes your position regarding the antlerless permit recommendations? Strongly agree

Do you have any additional comments about the antlerless permit recommendations?

Agree with this management plan. Anything to get our deer populations back up and provide good elk opportunity would be fantastic!

Which best describes your position regarding the once-in-a-lifetime permit recommendations? Strongly agree

Which best describes your position regarding the antlerless permit recommendations? Somewhat agree

Do you have any additional comments about the antlerless permit recommendations? I live in Willard and understand (without any facts, only hear-say), that a person hired by the DWR, was shooting deer found in orchards along highway 89-91 and my informant told me this person shot over 500 deer from Oct through Dec. Most of these animals were taken during dark hours using a spotlight and special "quieted" rifle so as not to disturb the neighborhood. AND, I heard, the meat from these animals was supposed to be processed and given to the needy, however, I was also told most of them rotted in the place they fell. I'd like to see these animals harvested by people who would actually use the meat while still keeping them out of the orchards. There needs to be signage readily available for people to know who the owners of these orchards are and how to contact them for permission to trespass and harvest animals.

Which best describes your position regarding the CWMU antlerless permit recommendations? Strongly agree

Which best describes your position regarding the proposed conservation permit rule revisions? Strongly agree

Do you have any additional comments about the conservation permit rule revisions? On an overall observation and as an interested sportsman in Utah, I absolutely LOVE these presentation videos and hope they continue even after this covid thing ends. It gives us a chance to see, and understand the reasons for the proposals, it gives us time to ask and receive answers to our questions long before the RAC and Board meetings. It basically gives us the necessary information to make good and informed decisions as to whether we agree with or not agree with the changes we see in the proposals. Please keep these going in the future! THANK YOU!

Which best describes your position regarding the buck deer permit recommendations? Strongly agree

Do you have any additional comments about the buck deer permit recommendations? I think the continued increase in permits over the years is hurting not only numbers in the state but also quality. Reduction is a smart move.

Which best describes your position regarding the bull elk and pronghorn permit recommendations?

Somewhat agree

Do you have any additional comments about the bull elk and pronghorn permit recommendations?

Would love to see the south cache get to a higher age class production output and meet objectives. The best elk hunts are all down south and it would be good to have at least one in northern Utah. Also curious how things landed with tag numbers for the HAMS hunts as the wildlife board seemed to want to offset the elk tag opportunity with these hunts and that thought seemed to be part of their decision. I think it would be helpful to see the aggregate comparisons of previous hunts for units now with HAMS. Comparing the old hunts (archery, early rifle, late rifle, muzzy and premium) tag numbers and harvest rates compared to the new HAMS hunt and estimated success rates for a realistic harvest comparison with this change would be insightful.

Which best describes your position regarding the buck deer permit recommendations?

Strongly agree

Do you have any additional comments about the buck deer permit recommendations?

I agree with the recommendations. I just think the right thing to do is have these plans in place, and the sportsman aware of them before the public draw process starts. It appears very deceiving when it's done after the draw closes. I can only assume that 300 people won't be seeing a reimbursement of the \$10.00 application fee.

Which best describes your position regarding the buck deer permit recommendations? Strongly agree

Do you have any additional comments about the buck deer permit recommendations? general season deer has become very crowded. even in the back country, I like the idea of cutting the tags and creating a better hunting experience. I would like to see changes to the extended archery unit, there are too many hunters crammed in the same areas, I think it would be better to only allow people to participate in the extended units every other year.

Which best describes your position regarding the bull elk and pronghorn permit recommendations? Strongly agree

Which best describes your position regarding the antlerless permit recommendations? Strongly agree

Do you have any additional comments about the antlerless permit recommendations? I support the decrease in doe deer hunts. I think we should provide a higher percentage of all antlerless hunts for youth and disabled hunters. also, I do not like the amount of deperdation tags I see being sold by private land owners. I believe 50% of those should be donated to youth only with no charge from the land owner

Which best describes your position regarding the CWMU antlerless permit recommendations? Strongly agree

Do you have any additional comments about the CWMU antlerless permit recommendations? I think the DWR does a great job with the management for the antlerless hunts on the CWMU program.

Which best describes your position regarding the buck deer permit recommendations?

Somewhat agree

Do you have any additional comments about the buck deer permit recommendations?

Why does the DWR always reduce the total # of permits after the application period when individuals have already paid to put in for these hunts? I'm all for decreasing the # of hunts in specific units where needed, but the DWR needs to look into having areas where you can only harvest a 4-point buck or better. Other surrounding states have already implemented these types of rules and they do not have the same amount of hunters in the field as Utah does.

Which best describes your position regarding the antlerless permit recommendations?

Somewhat agree

Do you have any additional comments about the antlerless permit recommendations?

Antlerless elk hunting is not what it use to be several years ago in Utah. When I first started hunting elk, there were elk everywhere, now you are lucky to see elk close up after spending multiple days in the field. Once the herds do come back the DWR puts out depredation tags and in a matter of a year or two wipes out the entire herd in those areas. I keep my fingers-crossed every year that one of these years I will finally draw a cow moose tag after years of putting in for a license.

Which best describes your position regarding the buck deer permit recommendations? Somewhat agree

Do you have any additional comments about the buck deer permit recommendations? I believe you need to make the muzzleloader hunt a primitive weapon hunt. Inline muzzleloader can only be use during the any legal weapons portion. I would like to see the same with archery or at least cut the length of the hunt down. They may have a low harvest rate but they have a high kill rate that never gets recovered.

Which best describes your position regarding the bull elk and pronghorn permit recommendations? Neither agree nor disagree

Do you have any additional comments about the bull elk and pronghorn permit recommendations? I've hunted the south cache spike unit for 30 years. We use to see over 100 head of elk every year and now we see maybe a dozen. The mountain lions needs to be reduces (tags limits raised) especially now we have wolfs up there. And again the muzzleloader hunt needs to be a primitive weapon hunt only allowing inline during the any weapon. and reduce the amount of time archery gets to hunt.

Do you have any additional comments about the buck deer permit recommendations? General season hunts are in Utah are really pathetic now and I want to stop the late season rut hunt because you are destroying any hope of taking at least a decent buck with this type of hunt nowadays with many of us having only weekends to hunt.

Which best describes your position regarding the bull elk and pronghorn permit recommendations? Strongly agree

Which best describes your position regarding the once-in-a-lifetime permit recommendations? Somewhat agree

Which best describes your position regarding the buck deer permit recommendations?

Somewhat agree

Do you have any additional comments about the buck deer permit recommendations?

I agree with the tag recommendations. I think our Statewide mule deer plan needs to be re-done or re-structured. I understand you cant stockpile deer but why cant we manage for a slightly higher buck to doe ratio? To me it seems buck to doe ratios have constantly decreased. Change the system. Stupidity is doing the same thing over and over again and getting the same result.

I hunt the dedicated hunter tag on the Cache every year. I spend a lot of time every year in the unit. There is a significant difference from 2013-2016 to now. I'm not even seeing the yearling bucks. What needs to change?

Which best describes your position regarding the bull elk and pronghorn permit recommendations?

Somewhat disagree

Do you have any additional comments about the bull elk and pronghorn permit recommendations?

If units like the Cache are struggling with the age class why keep hunting so many cows and spikes? I know you want opportunity but it doesn't make sense to cut the Limited Entry tags and not the cow, and spike tags.

Which best describes your position regarding the once-in-a-lifetime permit recommendations?

Somewhat disagree

Do you have any additional comments about the once-in-a-lifetime permit recommendations?

I could be remembering wrong but it seems like bison tags were severely cut last year and now there is a big increase again. Why the rollercoaster in the amount of tags? Instead of an increase of 50 and Decrease of 50 Keep it at a constant 120 tags.

Still would like to see Mountain Goats established in the Noami Peak area in Logan Canyon. Mountain Goats are a great once-in-a-lifetime species that seem a little more realistic to draw the tag than Sheep, or moose.

Once-in-a-lifetime should move to a random draw or you will lose the interest of hunters. Points don't mean anything anymore because it isn't realistic to plan on drawing a tag ever. Start with once-in-a-lifetime species then move to limited entry in a couple years. Point system is broken. How can my daughter who is about to turn 2 even get excited about these species when she is 12? By the time she gets her fist point it will take 38 or more points to draw. Points need to stop.

6% reduction to the CWMU permits ?

If we reduce general tags that will help. Northern Utah is covered with CWMU programs. The programs are overall a win win. A 6% reduction has to happen on these properties.

They have a ton of average, and alot borders public lands. I have work on several of these CWMU operations and it would not be a negative impact to their bottom line. I ee bucks all summer on public land, and see these same bucks get harvest in (NOVEMBER) on CWMU.

Again for the most part these programs are great. My family have been able to hunt on several ant it was a good experience. I really care about the mule deer of this state. I still guide for a friend who has a CWMU and he even thinks we need take some changes to the NOVEMBER dates and tag numbers. It will help the deer and that is the goal.

Thanks for all your hard work! It's not an easy job you guys have. I do appreciate it!

Which best describes your position regarding the buck deer permit recommendations?

Strongly disagree

Do you have any additional comments about the buck deer permit recommendations?

The Division has failed the deer herd and the deer hunters of this state. You continue to micro manage the hunters and seemingly ignore the status of the deer herd. Utah used to harvest as many bucks as we are now giving out tags for. This is a failure of epic proportions and a course correction is needed.

Your continued reduction of tags and reducing the size of the hunt areas shows your focus on buck to doe ratios and micro managing the hunters but the problem isn't the hunters. The problem is the number of does that are in the herd. The only way a herd can grow is if there are Does to be bred. You need to shift your focus off of the hunter and the buck to doe ratio and focus on what is killing the does. Take the resources currently used micromanaging the hunters and use it to figure out why the deer population isn't increasing.

The problem isn't the weather, there is something else restricting the deer population besides the weather and the buck deer hunters and you need to focus on the deer herd and find out what it is. For over 20 years you continue to blame the hunter (by reducing tags and hunt area) and the weather. It is time to admit your failure and make a course correction.

Buck deer hunting does not keep the population of deer from expanding yet your response to less deer is to cut buck tags and restrict hunt area size and ignore everything else. Ten years ago we hunters agreed to smaller hunt areas and reduced tags with the promise the deer herd would increase. The division has failed and the deer herd and the deer hunters are the ones who are paying the price of that failure.

Give out more tags (increase revenue) , increase the hunt areas size (let hunters disperse themselves and reduced your costs) and allow buck deer tags to take a bear or cougar and spend more time on figuring out what is killing does and fawns.

Which best describes your position regarding the buck deer permit recommendations? Strongly agree

Do you have any additional comments about the buck deer permit recommendations? I think this is an excellent plan. I kind of feel this has been over due especially in the Northern Region around the public lands in the Uinta Mountains region.

Which best describes your position regarding the bull elk and pronghorn permit recommendations? Strongly disagree

Do you have any additional comments about the bull elk and pronghorn permit recommendations? With the General Season any bull permits I see where the management perspective comes from. But I feel that the actual area where the bulk of these 17500 hunters have access is not small enough. In the last 10 years of hunting the same area it almost feels like we are lining up to hike the same ridges. It is take a number hunting, in the any bull zone. It seams like every year there is more land that is posted as private, thus adding extra pressure to other Zones. I almost think that zone should of been dropped to 12,500. I did not see in the presentation where you addressed any of the age class or harvest data from the any bull unit.

Which best describes your position regarding the buck deer permit recommendations? Somewhat disagree

Do you have any additional comments about the buck deer permit recommendations? I think the Northern Region needs to see more tag cuts. Especially in the East Canyon/Chalk Creek Unit. AS the age class went down last year. I think it would be a proactive approach for even more cuts on that Unit. I also think until Buck/Doe ratios increase there should be not Doe Tags issued in any region that has seen a decrease in the buck/doe ratios.

Which best describes your position regarding the bull elk and pronghorn permit recommendations? Somewhat agree

Which best describes your position regarding the once-in-a-lifetime permit recommendations? Somewhat agree

Which best describes your position regarding the antlerless permit recommendations? Somewhat disagree

Do you have any additional comments about the antlerless permit recommendations? I think the Antlerless Deer permits on Chalk Creek and East CAnyon should be cut even more. I would say no Antlerless Deer permits on any unit that saw a decrease in the buck/doe ratio. If no tags are not acceptable then I think bigger cuts are needed. I also think cuts in antlerless elk tags are needed in the East Canyon and Chalk Creek units are needed as well.

Which best describes your position regarding the CWMU antlerless permit recommendations? Somewhat disagree

Do you have any additional comments about the CWMU antlerless permit recommendations? I think any region that saw a reduction in the buck/doe ratio should see a decrease in antler less deer tags. If not totally eliminate doe tags in these regions including the CWMU hunts.

Which best describes your position regarding the bull elk and pronghorn permit recommendations?

Somewhat disagree

Do you have any additional comments about the bull elk and pronghorn permit recommendations?

The Bookcliffs needs to eliminate the spike elk hunt. I want to know what percent harvest has occurred over the past five years. I want to know what percent of the harvested bulls are getting tooth data accurately documented. I have hunted the Bookcliffs for 30 years and spend countless days on the unit. I have guided elk hunters on the Bookcliffs for over 20 years. I have watched as elk are being harvested that are NO WAY the age average on either the roadless or the road portion that match what is being claimed. A raghorn bull is not 7 years old, yet I see raghorn bulls being packed out the of the roadless at an alarming rate. The spike hunt has ruined the only truly backcountry elk unit in the state. A decrease from 20 tags to 6 is directly what Covey Jones said he intended to do (close the Bookcliffs mature bull hunt to allow for spike hunting) PERSONALLY TOLD TO ME BY COVEY. It is time to step up to the plate and close the spike elk hunt on the Bookcliffs. The herd is under objective and is in a decline in quality. The Bookcliffs was a great unit prior to the spike elk hunt, but has declined in quality due to the spike elk hunt. You cannot continue to kill spikes on the Bookcliffs and have a mature bull herd to hunt.

Which best describes your position regarding the proposed conservation permit rule revisions?

Neither agree nor disagree

Which best describes your position regarding the buck deer permit recommendations?

Strongly disagree

Do you have any additional comments about the buck deer permit recommendations?

Look at unit 1. It has few public places to hunt. You give the most tags to that unit. You have murdered the deer herd in box elder. I grew up hunting in one mile canyon, pilot, and now try to hunt grouse creek. I haven't seen a mature buck in 17 years in any of those regions. I see two points. You are alienating the people who have hunted their entire life to grow the herd in regions where you make the most money. It isn't drought that killed the northern deer herd. It's mismanagement by the state biologists and the empty suits who choose where they think deer should thrive. I would rather hunt 1 out of 3 years and have viable animals than paying every year to be disappointed in shot opportunities and angry at over crowded public lands.

Which best describes your position regarding the bull elk and pronghorn permit recommendations?

Strongly disagree

Do you have any additional comments about the bull elk and pronghorn permit recommendations?

The three season tag puts too much pressure on the animals and since it was started I have seen a drastic decrease in elk.
